SUMMARY

I am a hard working, originative junior developer that loves anything with a circuit board. I'm a quick learner, and am not ashamed of making mistakes along the way. In my spare time, I enjoy playing with my Raspberry Pi, and connecting with people at Portland tech meetups.

EXPERIENCE

Computer Technician, M. Sass Co.

Eugene, OR— July 2014 - January 2016

I was in charge of potential purchases of electronic inventory, analysis of profit, full refurbishment of laptops and hand-held devices, technical related customer questions, and safe/secure packaging. Before resigning, I trained two technicians to manage and assist the refurbish process.

Accomplishments

- Obtained Microsoft Certification (MAR)
- Helped open a Computer Department for Mamma Sass
- Promoted to Lead Technician
- Increased Company Revenue by 35%

Staff / Property Manager, Sky Lake Lodge

South Lake Tahoe, CA — December 2012 - June 2014

I managed finances, staff, and the upkeep of the property, in addition to being in charge of city taxes, transient occupancy taxes and monthly reports of revenue. I also dealt with occasional evictions and court-hearings for evicted residents.

Accomplishments

- Implemented a new telephone-system, diverging from old landline technology to VOIP
- Developed a hotel bookkeeping desktop application using MS Access connected to MySQL using ODBC
- Redesigned Sky Lake Lodge's Website

EDUCATION

Epicodus

January 2016 - July 2016

I learned how to pick up different types of languages/frameworks/tools at a moment's notice at Epicodus. This vocational school taught me the foundations of being a junior web developer, and am excited to take these things I've learned and put them in the work force.

SKILLS

- Problem Solving, Debugging, Willing to learn, Communication
- C#, .NET, NancyFx, Xunit, BDD/TDD
- Javascript, TypeScript, Node, Angular, JQuery, Gulp, MochaJs/ChaiJs
- SQL, MS-SQL Server, JSON, AJAX, Restful
- Bash, Powershell, Git, Vim
